Word from the Founder

In 2026, we took a major step forward with the launch of Signature Foundation. Years spent in healthcare have shown us that making a difference goes beyond treating illness. It means reaching people where they are, grasping the challenges they face, and creating opportunities for better health. Signature Foundation was created from this understanding and from our ambition to turn experience into meaningful and long-lasting social impact.

Our vision is clear: contributing to a healthier, safer and more resilient communities across Kenya by leveraging our expertise, strong partnerships and sustainable philanthropy. Our purpose lies in empowering people not only to receive care when they are unwell, but also to understand, prevent and take greater ownership of their wellbeing. We believe that health and education are two fundamental pillars of a dignified life, and that both should be accessible to every individual, regardless of income or geographical location.

Our mission is simple: Improve access. Build awareness. Change outcomes. Signature Foundation aims to change lives through medical outreach, enhanced knowledge, strong partnerships and initiatives supporting vulnerable populations across the country. While healthcare is at the heart of our journey, our ambition extends far beyond it. We seek to contribute equally to education, community development, women's empowerment, innovation and other initiatives that strengthen the resilience of Kenyan communities.

As part of our devotion to improving access to medical care, we are proud to have hosted our first "Free Medical Camp" on 25 and 26 September 2026, marking the launch of our first community initiative. This intervention represents the beginning of a long-term commitment to placing positive social impact at the core of our values and actions. It is a promise to listen to communities, understand their needs, and deploy our resources, expertise and partnerships to where they can make a difference.

The success of this Medical Camp is not ours to celebrate alone. It belongs to every community member who participated, every professional and volunteer who gave their time and expertise, and especially to every partner who made it possible to serve the community. Their collective contribution is what made this first initiative fruitful and impactful.

We know that lasting change is not created through a single event. It is built through consistency, trust, collaboration and a genuine care for the people we want to serve. This first report captures the beginning of that journey: the communities reached, the services provided, the people involved and the lessons that will help shape what comes next.

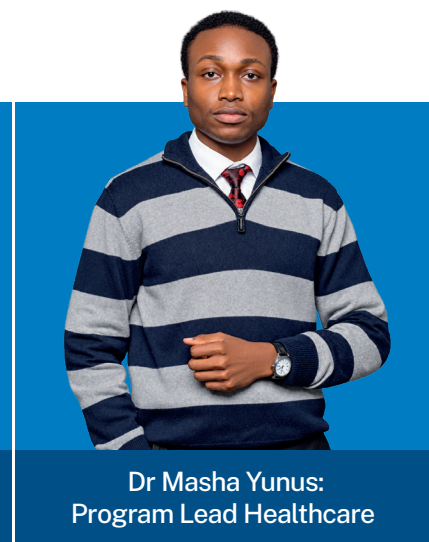

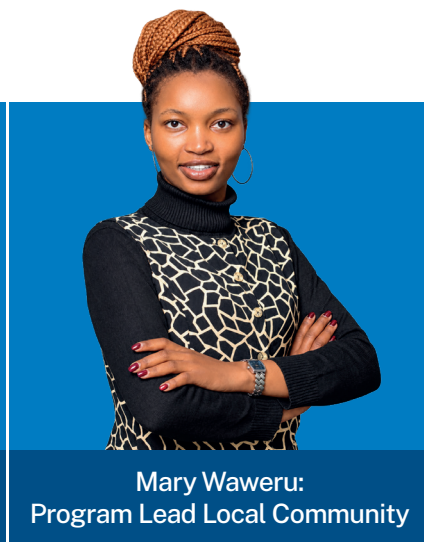

As we embark on this new chapter, our hope is that Signature Foundation will become a platform for trusted partnerships with those who share our commitment to creating positive change; one that continues to listen, learn and act where it matters most. "Safer, healthier lives for every Kenyan community" it is our commitment to the communities we serve.

“
Safer, healthier lives for
every Kenyan community
”

Iftikhar Mohamed
Founder of Signature Foundation.

Foundation Team:

Vision:

Safer, stronger lives for every Kenyan community.

We envision healthier, more resilient communities across Kenya where equitable healthcare access and preventive education empower people to live safer, stronger lives. By maintaining transparency and separating social good from commercial intent, we aspire to be a trusted leader in sustainable healthcare impact.

Mission:

Improve access. Build awareness. Change outcomes.

Signature Foundation improves healthcare access, awareness, and outcomes within communities by delivering genuine social impact programs. Through medical outreach, preventive health education, and partnerships, the Foundation supports underserved populations while building trust and credibility in the healthcare ecosystem.

Our Guiding Principles:

Our guiding principles define how we turn our vision into action. They shape the way we engage with communities, build partnerships and deliver initiatives while ensuring that every effort is rooted in quality, collaboration, prevention, positive change and lasting impact.

1. QUALITY - Care with dignity

We are committed to providing quality healthcare services that respect the dignity, needs and wellbeing of every individual and contribute to healthier lives within communities.

2. UNITY - Stronger through partnership

We believe change is achieved collectively. By building trusted partnerships with healthcare professionals, organisations, institutions, communities and sponsors, we bring together our resources to reach those who need them most.

3. PREVENTION - Empower through knowledge

We promote preventive healthcare and education, equipping individuals and communities with the knowledge they need to understand risks, make informed decisions and take greater ownership of their health and wellbeing.

4. CHANGE - Impact through action

We are committed to creating meaningful, measurable change by engaging directly with communities and responding to their needs. Through initiatives that promote health, education, women's empowerment and community wellbeing, we seek to turn good intentions into tangible outcomes.

5. SUSTAINABILITY - Building lasting social impact

We believe significant change must extend beyond individual initiatives. By leveraging our healthcare expertise, knowledge, partnerships and resources, we strive to develop programmes that create lasting value and strengthen communities over time.

Our main intervention areas:

- Healthcare
- Education
- Environment

Our **Unique Approach:**

Our approach is grounded in three principles that enable us to understand communities, respond to their needs and create meaningful, sustainable impact.

1. EXPERIENCE-LED

Our experience and background in healthcare give us a first-hand understanding of the challenges faced by individuals and communities in accessing quality care. This knowledge enables us to identify needs, understand gaps in healthcare provision and use available insights and data to guide where and how our interventions can create the greatest impact.

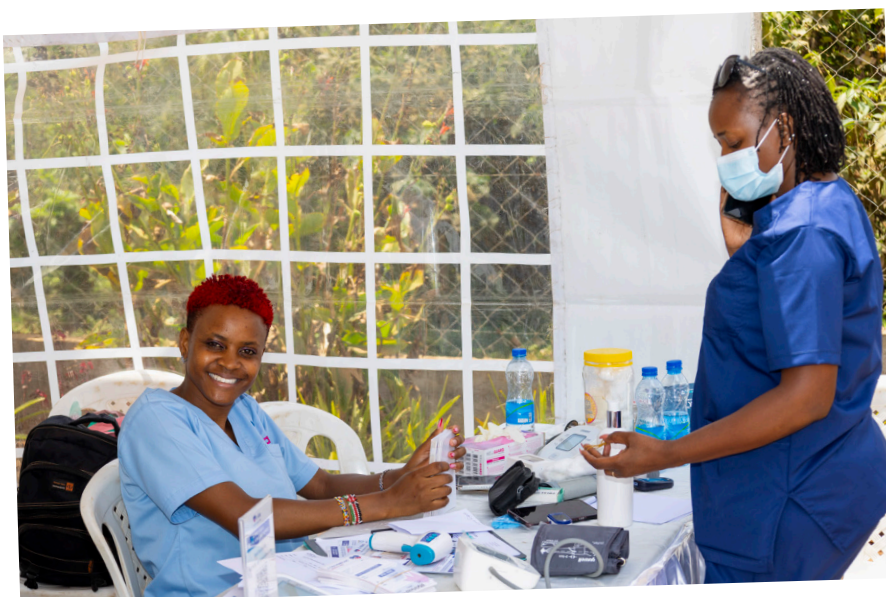

2. LOCALLY-LED

We believe effective solutions begin with listening. By engaging directly with community members and local stakeholders, we seek to understand their realities, priorities and specific needs. This locally-led approach allows us to design and deliver services that are relevant, accessible and responsive to each community we serve, rather than applying a generic approach.

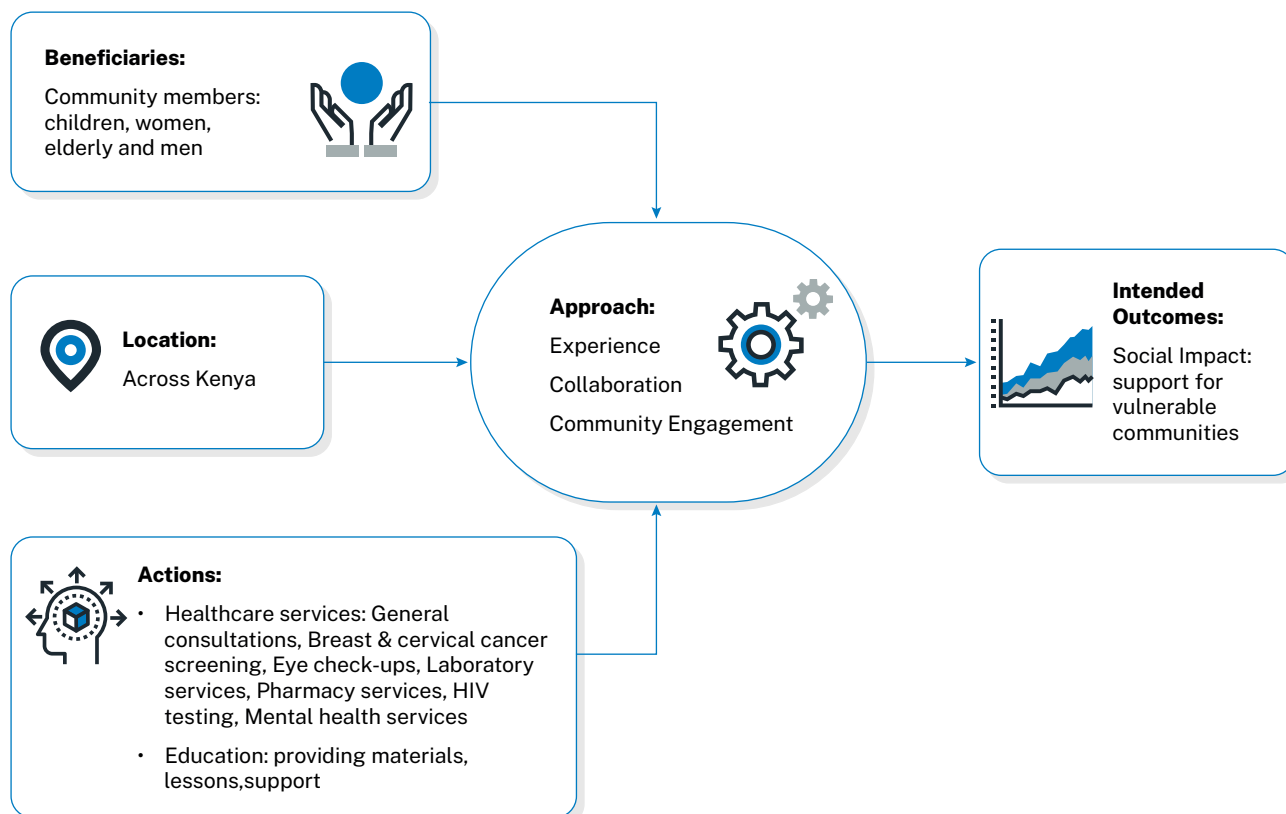

3. COLLABORATION-DRIVEN

We believe lasting impact is built through unity. By bringing together partners, sponsors, healthcare professionals, organisations, institutions and community stakeholders, we combine expertise, resources and networks to extend our reach and strengthen the impact of our initiatives. Through these partnerships, we can make a difference.

Our Path to impact:

UNDERSTAND → CONNECT → ACT → EMPOWER → IMPROVE → MAKE A DIFFERENCE

Intended Outcomes

1. Better health outcomes

Communities have improved access to healthcare, greater health awareness and stronger capacity to prevent and manage health challenges.

2. Greater access to education and knowledge

Children, youth and adults gain access to education, skills and knowledge that expand their opportunities and ability to thrive.

3. Stronger and more empowered communities

Vulnerable individuals, women and young people have greater access to support, opportunities and resources that strengthen their resilience and independence.

4. Increased community resilience

Communities are better equipped to respond to social, economical, environmental and healthrelated challenges.

5. Sustainable and inclusive development

Partnerships, innovation and responsible use of resources contribute to long-term social impact and sustainable community development.

Medical Camp, our first impact story:

25 & 26 September 2026

On a Friday morning in Limuru, in the courtyard of the Jamia Mosque, something exceptional was taking place. Tents already set up, healthcare professionals ready, volunteers in place, and medicine stocked. Word travelled quickly through the streets of Limuru, carried by a car announcing the Free Medical Camp and inviting the community to come, receive care and be heard. One by one, people began to arrive. Some came for a general consultation, others for pharmacy services, while some simply came out of curiosity. But the range of services awaiting them went far beyond what many expected:

General consultations
Breast & cervical cancer screening
Eye check-ups
Dental check-ups
Laboratory services
Pharmacy services
First aid support
Nutrition & dietetic services
HIV testing
Mental health services

By the end of the first day, preparations were already underway for the second. Over the course of the two-day camp, 806 people benefited from free medical services.

But behind the number 806 are 806 individuals, each with their unique and own story. Meet Yasmine, recently moved to Kenya for work, she volunteered at the Free Medical Camp in Limuru.

“The Signature Foundation’s Free Medical Camp in Limuru was actually my first experience volunteering with the Foundation. I didn’t know exactly what to expect, but I knew I wanted to help in any way. What I didn’t expect was how deeply one conversation would stay with me.

During the camp, I was helping in the eye care tent and that’s when I met an older man who had been experiencing serious difficulties with his eyesight. His vision had completely deteriorated, but without the means to access the medical care and attention he needed, he had simply learned to live with it and suffer in silence. He continued working along the road in Limuru, selling items to make a living, despite the hardship he was facing.

On his way walking to work that day, he happened to hear a group of men talking about the Free Medical Camp. He went back home and asked his grandchild to take him there. He wasn’t even sure he would find the

“

For some people, an opportunity like this is not simply another option. It can be their only chance to receive the care they need. And I think it is our role to create more chances for them.

”

treatment or care he had been looking for. But he decided to take the chance anyway.

And that is what stayed with me the most: he still took his chance. For some people, an opportunity like this is not simply another option. It can be their only chance to receive the care they need. And I think it is our role to create more chances for them.

Seeing the number of people who came to the camp and benefited from the services offered was truly heartwarming. From general consultations and eye check-ups to breast and cervical cancer screening, dental care, HIV testing and mental health support, the camp provided a wide range of essential services and all free of charge.

For me, this experience was a powerful reminder of why initiatives like this matter. It was not only about providing medical services; it was about listening, being there and making healthcare more accessible to people who may otherwise go without it.

I’m very grateful to have been part of this first action and excited for more. In fact, by the end of the camp I’ve already registered for the next one : a visit to a Children’s Centre in Limuru.

I look forward to seeing Signature Foundation continue to grow its work and create meaningful impact across Kenya. I was truly impressed by the level of care, commitment and dedication that went into making this initiative possible, and I’m grateful to have been part of it.”

Written by Yasmine,
Volunteer at the Free Medical Camp Limuru.

Maximising Impact, One Patient at a Time

Cost & Reach:

The Signature Foundation Free Medical Camp was made possible through a **KES 500,000 contribution majorly funded by Signature Healthcare Limited**, enabling 806 individuals to access essential healthcare services over two days. This represents an average investment of approximately **USD 4.80 (KES 620) per individual reached**.

But behind this figure lies something far more meaningful than a cost. For less than five dollars per person, individuals could access healthcare services that might otherwise have remained beyond their reach. A consultation could help someone better understand a health concern, an eye check-up could be the first step towards addressing deteriorating vision, and access to medication could provide relief and support better wellbeing.

The camp demonstrates how a relatively modest investment, when directed towards community needs, can open the door to essential care for hundreds of people. **Because sometimes, less than five dollars can make a difference in someone's life.**

To donate:

Via Mpesa:	Via Bank Transfer:
PayBill: 522522 Account Name: Signature Foundation Account Number: 1354949978	Bank Name: KCB Bank Bank Account Name: Signature Foundation Account Number: 1354949978

Biggest Expenditures

- Pharmaceutical and non-pharmaceutical medical supplies
- Tent rental and setup
- Community mobilisation (CBOs and Community Health Volunteers)
- Staff facilitation and operational support

Key Financial and Operational Challenges

- Limited Funding for Specialised Medical Tests
- Volunteer Availability and Facilitation
- Transportation and Logistics Costs: Managing transport expenses for medical supplies, equipment and personnel.
- Limited Financial Partnerships and Sponsorships: the need to secure additional funding partners to support a wider range of services and reach more communities.

A look back in **photos:**

Special thanks:

With Gratitude

Our heartfelt thanks go first to the people of **Limuru, Kenya**, whose trust, participation and engagement made this initiative meaningful. Every individual who attended the Free Medical Camp was at the heart of this effort, reminding us why accessible healthcare matters.

We extend our sincere appreciation to our local **partners, sponsors and supporting organisations**, whose collaboration, resources and commitment helped bring this initiative to life. We are equally grateful to the healthcare professionals, volunteers and Signature Foundation team who dedicated their time, expertise and energy to serving the community.

Through local partnerships and collective action, we are helping bring essential healthcare closer to the vulnerable communities who need it most.

Together, we are making a difference.

Our Partners in Impact

Partners	Service and contribution
Signature Healthcare Ltd	Principal financial donor and provider of medical supplies and medicines.
Tilisi PLC	Provided financial support through a monetary donation
E-TIBA	Triage
Elephant Dental	Provided dental care services.
Jamia Mosque – Limuru	Provided the venue for the Free Medical Camp
Kenya Association of Muslim Medical Professionals (KAMMP)	Referral Consultants for advanced cases
PsychX	Provided mental health services and support
Reliable First Aiders	Triage and First aid when required
Richland Security Services	Provided security personnel
Eye & U	Provided eye care services and check-ups.
Limuru Cottage	Volunteers and medical examination couch provider
Limuru Nursing Home	Volunteers and medical examination couch provider
County Government of Kiambu	Regulatory Approvals
Tigoni Level 4 Hospital	Necessary Approvals for the camp and a Referral Facility

Making a difference together.
